

Easy Visibility to Truck Haul Ticketing Data & Analytics

DeltaV™ SaaS SCADA
available with Truck Ticket View
Efficiencies delivered with remote view of truck haul log analytics

Challenges with Truck Haul Ticketing Data

You depend on tank asset and fluid logistics information that can quickly reduce operational profitability and sustainability due to the complexities surrounding getting the data to the right people, at the right time.

With Emerson's DeltaV™ SaaS SCADA Truck Ticket View now you can quickly and easily connect, gain visibility and control of remotely located asset and logistical data analytics to significantly reduce needs for site visits.

Stranded Data

Lost Productivity

Lack of Control

Compliance Issues

Lack of Resources

Unknown Allocation

Easily achieve operational excellence, regulatory compliance and business sustainability

Quickly aggregate truck haul tickets to easily analyze trends to gain tank, fluid & hauler data & activities and metrics. Provide your staff with anytime, anywhere access to clear dashboards, reports and alarms to pro-actively monitor assets & optimize workflows.

- Auto-data collection & reporting for compliance
- Easily align resources and allocation to scope
- Optimize fluid logistics, hauler routes, and inventories

DeltaV SaaS SCADA is available with Truck Ticket View and leverages the Production Manager – Tank Manager application, running on an Emerson FlowBoss™ 107 or ROC800-Series flow computer to remotely collect and display truck haul information to the DeltaV SaaS SCADA platform, reducing or eliminating the need for personnel to download haul information locally from the devices, improving operational efficiency and reducing cost.
