

Type EZH* with 6350 Series Pilot / 161EB Pilot Supply

For Use with Inlet Pressures Below 600 PSIG

For inlet pressures above 600 psig, a Type H120-350 Pop Relief should be installed between the 161EB and the 6350 Series pilots. Overpressure protection should also be provided on the outlet side of the Type EZH or on the sense line of the 6350 Series pilot.
