

# Connected Services unlocks powerful onboard diagnostics of your Gas Chromatographs to maximise uptime and measurement performance

## Measurement

- ▶ Maintain measurement performance with early detection of potential issues

## Avoid unnecessary work

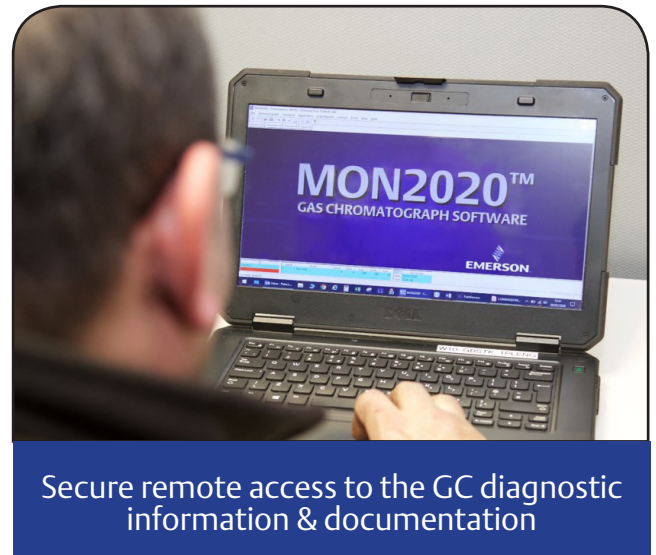

- ▶ Data driven decisions
- ▶ Repair when necessary
- ▶ Minimize unnecessary routines

## Optimized costs

- ▶ Avoid unplanned maintenance and costs associated with travelling to remote locations

## Performance

- ▶ Improved performance with remote validation and calibration

- *Experts can remotely monitor GC condition, execute remote diagnostics, interpret the results and provide an actionable summary*
- *Analysis of alarms and alerts to identify immediate action*
- *Periodic reports on the condition & performance of your gas chromatograph*
