

Simplify and accelerate work with MyEmerson

MyEmerson is a personalized digital experience with instant access to dedicated digital content for yourself and colleagues across the organization. With a MyEmerson account, you can easily view technical documentation, access past records, order replacement parts and schedule service right at your fingertips!

MyEmerson keeps you connected to the information and insights you need, when you need them. Get started today by registering for an account at emerson.com/myemerson.

Features

- Digital Customer Experience and a Centralized Workspace
- Value of a digital customer experience
- More efficient engineering
- Self-service information

Benefits

- MyEmerson serves as a self-service tool to aid in collaboration with co-workers on the same solution or project. Errors are reduced through improved communication, collaboration and centralized tracking.
- MyEmerson is available 24/7 for quick and easy access whether you're at your desk or in the field. Customers can access ecommerce workflows, use engineering tools and configurators for product specification, find relevant documents you need quickly with a QR code and collaborate with experts.
- Rather than using ordering and specification tables in product documentation, engineers can build a model number in real-time using a visual configurator. This provides the ability to see a physical representation of the device to ensure it meets their requirements, engineering tools allow them to specify exact operating conditions to confirm their selection.
- By using MyEmerson, engineers can specify a product online and immediately generate a CAD drawing for design work or installation projects. With digital tools at your fingertips, engineers can specify a product online and immediately generate a CAD drawing of the product.

MyAssets

Features

- Locating a device is quick and simple
- Maintenance schedules are easy to maintain and keep track of.
- Become more efficient in your day-to-day work

Benefits

- MyAssets provides a single source for up-to-date information (including replacements, spare parts and reordering), specifications and technical documentation for more than 31 million Emerson devices.
- Customers can easily view device documents to access serial number specific documentation, review device events, request service and plan for walkdowns.
- MyAssets provides quick and easy device identification with a QR code scan, RFID, by entering a serial number or tag number; create work packets faster with easier access to device information; plan upgrades and replacements more easily with manufacturer recommendations; and manage lead times for replacements and spare parts using the online procurement tool.

MySoftware

Features

- A single location to manage your software needs for Downloads & Drivers, applications and firmware

Benefits

- MySoftware simplifies the tasks to get through the lifecycle of your facility from planning and execution of capital projects, to operating and maintaining assets overtime.

MyTraining

Features

- Training at your fingertips.
- MyTraining follows IACET (International Accreditation for Continuing Education and Training) practices and policies.
- MyTraining is a one-stop-shop for continuing education.

Benefits

- MyTraining provides courses that hone critical thinking skills and help employees keep up with industry trends. Learning can be completed online, instructor led or onsite at a facility. MyTraining builds upon employee's skills based on their job role/responsibility, persona and competencies.
- Comprehensive and accredited training on MyEmerson products.
- View training history, search for classes and register for courses from a single, convenient location within MyEmerson

MyTransactions

Features

- View or place an order, view order history, generate quotes and request purchase orders in one seamless and easy location.

Benefits

- Once an order is placed, MyEmerson provides real-time visibility into order status and tracking information. This allows you to help plan your project and maintenance schedules more accurately. Having insight on past orders allows you to view spending trends and budget appropriately.

MyWorkspace

Features

- Create configurators, create CAD drawings and diagrams or generate the proper documentation all in one place.

Benefits

- With all the tools you need in one location, you're able to create design solutions quickly and confidently in one place. The additional ability to collaborate with colleagues allows you to easily implement new solutions for your business.
