

National Service Centre

Quickship and Repair Centre

In Bayswater Victoria, the Emerson Quick Ship & Repair Centre provides the local market with more than 6,000 products and service solutions for the Rosemount pressure, temperature and DP level instrumentation range. Included is the capability to manufacture and repair remote seals and return existing devices back to their original performance specifications in accordance with Emerson's global quality manufacturing standards.

- Brand new instruments, manufactured to order
- Hazardous area certified manufacturing (IECEX)
- 48 hour or 5 day manufacturing priority and dispatch
- ISO9001 endorsed; global quality, local solution
- Advanced service and repair capabilities

Flow Calibration Centre

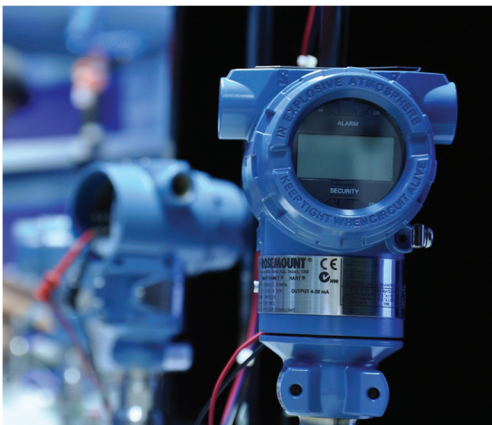

Emerson offers a high precision flow calibration service for world-leading Micro Motion, Rosemount, Flow and Daniel products, as well as many other flowmeter brands. The Melbourne-based facility has been designed to stringent engineering and quality standards to provide an exceptional flow calibration service. The flow calibration centre has a best in class uncertainty and conforms to ISO 9001 and AS 3912.1-1993. With its central location it can help your organisation conform to regulatory requirement; improve process efficiency and enhance product quality by providing fast, reliable and quality calibration services.

Performance & Applications

- Mass and volume calibrations with international traceability
- Best in class +/- 0.05 % flow uncertainty
- Line Sizes: Process connections from 3mm to 200mm

Optimised Logistics

- Fast calibration services with guaranteed 24-hour emergency turnaround available upon request
- Diagnostic testing and repair services for all Emerson flow meter technologies
- Shutdown support and pre-planned maintenance services

National Repair Centre

In Emerson Australia's National Repair Centre, technicians work quickly to diagnose your potentially non-functioning or mission critical measurement instruments. Backed by both the factories and service centres around the world, our team can provide unmatched measurement instrument support.

Emerson's assessment and repair service is designed to minimise disruptions and downtime, to help keep your process and your business running by providing:

- Expert advice in whether the most cost-effective and safest course of action is to repair, replace or upgrade each sub-performing product.
- Factory-certified technicians repairing to factory specifications, to ensure device performance and accuracy
- Repair utilising Emerson's original equipment spare parts to protect your investment and equipment lifecycle.
