

# Emerson Plantweb Insight™

## Inline Corrosion Monitoring Application

- Visualization and analytics software platform providing strategic interpretation and monitoring of plant assets
- Relevant-time actionable information and insights about abnormal situations, asset status, asset health, energy costs, emissions loss, etc.
- Seamless system integration, simple installation, and minimal configuration or set-up are not dependent on the host system or historian.
- Prepackaged analytics based on decades of process and industry experience
- Human-centered design and a user-tested interface for consistent and intuitive navigation

# Features and benefits

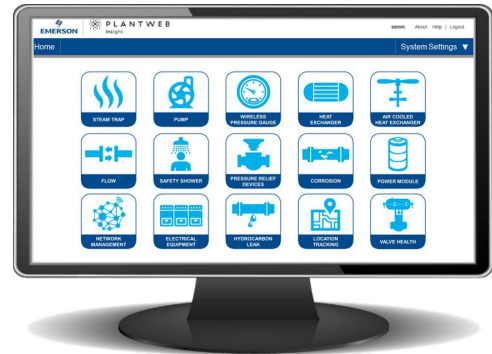

## Gain real-time insights into abnormal situations

- Suite of asset monitoring applications identifying abnormal situations and failures using data analytics and models.
- Learn about issues before they impact the bottom line with alerting and failure identification.
- The intuitive and easy-to-read views highlight high-priority, actionable information.

## Lightweight, secure, and reliable software package allows seamless integration into current infrastructure

- Easily deployed via a virtual machine.
- Access the interface anytime from a multitude of web browsers.
- Human-centered design considerations allow for quick and intuitive start-up and configuration.
- Integrate with existing wireless ecosystem to expand capabilities and leverage current investment.
- Not dependent on DCS, host system, or historian.

## **Monitor one asset or thousands with a fully scalable software package and numerous applications**

- Applications are based on key assets such as steam traps, pumps, heat exchangers, pressure relief valves, and many more.
- Start small or monitor all your assets in one spot.
- Integration with other business systems, such as data historians.
- Deploy in small, large, or enterprise-wide operations.

# User interface

Every application in the Plantweb Insight suite has a similar look and feel for a consistent user experience. The main views can be broken into three layers:

## Dashboard

The dashboard page is an umbrella overview of the asset class being monitored. This page will provide an aggregated view of the entire asset class and the most important insights. These insights will vary from application to application, with examples including asset status, asset health, energy costs, emissions loss, critical alerts, etc. A brief trending of these key insights is also provided for historical tracking and trending.

## Asset summary

The asset summary page is a tabular view of all assets being monitored. This view provides a similar perspective as the dashboard but on an asset-by-asset basis. This page is fully sortable, searchable, and filterable for quick prioritization and identification. The asset summary page can also be exported via CSV or Excel® for reporting.

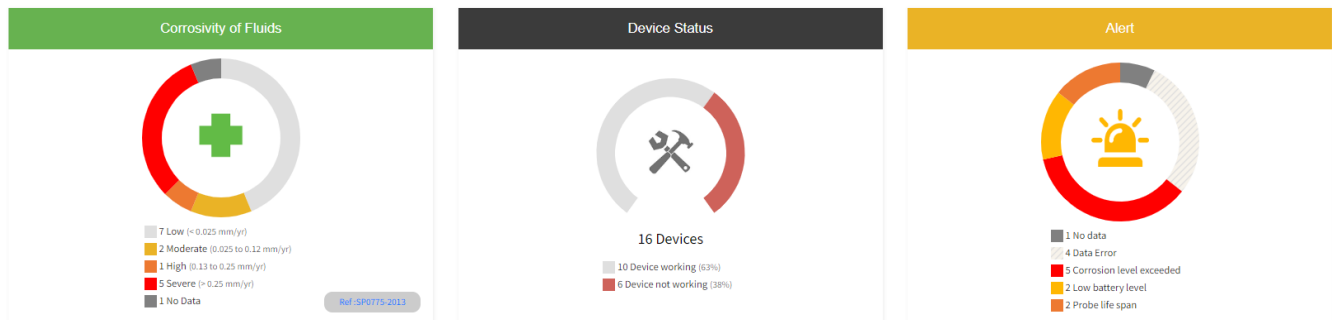

Asset ID	Site	Location	Asset Status	Energy Loss (LHD (L) / Year)	Carbon Emissions (Metric Tons / Year)	Downtime
ST101	Site 1	Unit 1	Good	---	---	15 days
ST102	Site 1	Unit 1	Good	---	---	15 days
ST103	Site 1	Unit 1	Blow Through	2096	60.32	1 day
ST102	Site 2	Unit 1	Blow Through	1245	42.29	20 days
ST103	Site 2	Unit 1	Good	---	---	13 days
ST104	Site 2	Unit 1	Good	---	---	6 hours
ST104	Site 1	Unit 2	Good	---	---	10 hours
ST105	Site 1	Unit 2	Good	---	---	25 days
ST106	Site 1	Unit 2	Flooded	---	---	2 hours
ST105	Site 2	Unit 2	Good	---	---	1 day
ST106	Site 2	Unit 2	Blow Through	1552	48.17	5 hours
ST107	Site 2	Unit 2	Plugged	---	---	20 days
ST107	Site 1	Unit 3	Plugged	---	---	9 hours
ST108	Site 1	Unit 3	Plugged	---	---	3 hours
ST109	Site 1	Unit 3	Healthy	---	---	1 day
ST110	Site 1	Unit 3	Good	---	---	5 days
ST110	Site 2	Unit 3	Good	---	---	12 days
ST110	Site 2	Unit 3	Good	---	---	4 days
ST120	Site 2	Unit 3	Good	---	---	12 hours

## Asset details

The asset details page provides specific asset details. These details include location, process, application, asset, and device details for each individual asset. It also provides calculated insights such as relevant-time status, health, energy, emissions, additional information, and a brief asset history. A notes section allows users to add notes and flag assets for follow-up.

The configuration page is divided into several sections: 'Location Detail' (Asset: SteamTraps, Site: Shalcope, Location: Unit 2, Area 3), 'Steam Trap Detail' (Manufacturer: Armstrong, Model: 100, Type: Float & Thermostat, Office Size: 0.15, Installation Date: 12-01-2016), and 'Process Detail' (Application: Process, Critical: 10). It also features an 'Asset History' chart showing status changes (Plugged, Blow Thru, Flooded, Good, Healthy, Out of Service, No Data Error, Not configured) and a 'Notes' section with an 'Add Note' button.

# Inline Corrosion application

## Features

- Continuous corrosion rate monitoring of pipelines and assets
- Provides corrosion rate trends.
- Provides relevant corrosion probe status and alerts (i.e. probe life-span, severe corrosivity, low battery level and no data)
- Manual configuration of thresholds for alerts
- Predictive diagnostics and alerts allow prioritization of device maintenance

## Calculated insights

- Corrosion rate trends
- Corrosivity of fluids
  - Severe corrosion
  - High corrosion
  - Moderate corrosion
  - Low corrosion
- Electric Resistance (ER) probe expected life
- Device status

# Communication specifications

## Inputs

**HART-IP™ client** Plantweb Insight acts as a HART-IP client for polling information from HART-IP sources such as Emerson 1410S Gateways.

# Ordering information

## Ordering process

1. Build and order your subscription order code.
2. You will receive instruction on where to download your application and framework software if you have not already done so.
3. Upon installation of an application onto the framework, the software will instruct you on how to request a license key.
4. A license key will be generated upon request based on your subscription order code.

---

**Note**

The subscription duration starts at the time the license key is generated.

---

## License key

Plantweb Insight applications require a valid license key to be used. License keys are delivered upon placing an order for a subscription order code and submitting a locking ID from the software. Plantweb Insight license keys are provided as a file.

## Subscription order code

The subscription order code contains the details related to the software subscription used to generate a license key. This code is not your license key to activate your software. Exact subscription order codes will vary; an example of a typical subscription order code is shown in [Figure 1](#).

**Figure 1: Subscription code example**

XXXXXXX    XXXX

**1**            **2**

1. Required subscription component (7002IC base code)
2. Subscription type (subscription duration and maximum number of assets to be monitored)
  - An asset is 10 sensors
  - Trial licenses are limited to the smallest asset capacity (requires new or existing infrastructure)

**Sample subscription code**    **7002IC C050**

## Emerson Plantweb Insight Inline Corrosion application subscription ordering information

### Subscription application

Code	Description
7002IC	Plantweb Insight Inline Corrosion Monitoring application

### Subscription duration and assets

Code	Description
T001	90-Day trial
A005	1-Year subscription for 5 assets
A050	1-Year subscription for 50 assets
A100	1-Year subscription for 100 assets
A999	1-Year subscription for custom number of assets per site
B005	2-Year subscription for 5 assets
B050	2-Year subscription for 50 assets
B100	2-Year subscription for 100 assets
B999	2-Year subscription for custom number of assets per site
C005	3-Year subscription for 5 assets
C050	3-Year subscription for 50 assets
C100	3-Year subscription for 100 assets
C999	3-Year subscription for custom number of assets per site
E005	5-Year subscription for 5 assets
E050	5-Year subscription for 50 assets
E100	5-Year subscription for 100 assets
E999	5-Year subscription for custom number of assets per site

# Specifications

## System requirements

Plantweb Insight is delivered as a fully developed virtual machine (e.g. .ova file) and applications are installed once the virtual machine is deployed.

### On-Premise Host system

#### Virtualization software

- VMware Workstation Pro™ 15 or higher (requirements can be found in [VMware Desktop Hypervisor](#))

OR

- VMware vSphere® 6.5 or higher (requirements can be found in [VMware vSphere](#))

OR

- Microsoft® Hyper-V Configuration version 8.0 or higher (requirements can be found in [Introduction to Hyper-V on Windows](#))

#### Hardware requirements (minimum)

- Processors = 4 dedicated cores<sup>(1)</sup>
- Memory = 8 GB RAM
- Hard drive = 512 GB of free space

#### Hardware requirements (recommended)

- Processors = 8 dedicated cores
- Memory = 16 GB RAM

### Cloud environment capability

- Plantweb Insight has the ability to be hosted in the cloud on an Emerson Microsoft Azure instance.

### Web client

#### Browsers (recent versions supported)

- Google Chrome™
- Microsoft Edge

---

(1) Most PC operating systems (i.e. Windows, Linux, Mac) will use one to two cores.
