

Subject: Release of ProLink® III v4.5 Software

Overview

This documents the release of new software for the ProLink® III application. The version of this software is 4.5. The build number of this software release is Build 436 Revision 2. Download links for the Basic full release or the Professional upgrade-only release can be found on the **ProLink III Updates** web page referenced below.

Products Affected

ProLink III software application

NAMUR NE 53 Rating

This release is rated at NAMUR NE 53 Level 2.

Symptoms

The following symptoms may appear with previous versions of ProLink III software:

1. Smart Meter Verification (SMV) schedule configuration data was not included as part of ProLink III configuration files. This device configuration data has now been added.
2. The pressure compensation screens and UI are often needed whenever APM or API are enabled in a connected device. However, ProLink III would only show the pressure compensation UI under specific conditions not related to APM or API.

Resolution

All items listed above have been resolved with this new revision of software.

Additional Features

This version of software includes the following changes to device support over previous versions:

1. Added ProcessViz Version 2.0, Build 138, Revision 1 integration links to the ProLink III Professional application on several appropriate screens where users may want to view logged data, trended data, or device historian data. The CD distribution media now contains installers for both ProLink III and ProcessViz. Note: ProcessViz is licensed separately from ProLink III, using a similar process of activation with a site key.
2. ProLink III Basic now supports the customer information page of the SMV Run Test wizard.
3. ProLink III Basic now supports Modbus TCP communications protocol.

ProLink III Updates

To update an existing version of ProLink III Professional, or to download a new installation of ProLink III Basic, go to the 'Software Downloads & Drivers' section of the ProLink III webpage (www.emerson.com/ProLink).

There is no change to the purchasing or licensing procedures for ProLink III Professional.
