Subject: Micro Motion CDM Software Release 2.20

Overview

This bulletin documents the release of new software for the CDM. The version of this software is 2.20. Weights and Measures version 1.1.

Products Affected

CDM Analog (Transmitter Output Options C and D) and TPS (Transmitter Output Option B) versions

NAMUR NE 53 Rating

This release is rated at NAMUR NE 53 Level 2 with a NAMUR NE 53 version of 01.02.02.

Symptoms

The following symptoms may appear with CDM:

- The meter would not start up when power cycled at or above 60°C.
- The API reference temperature was limited to lower values than specified by the 2004 standard.
- When using API table E, if both the density and temperature were out of limits, only the temperature out of limits alert was displayed.

Resolution

- All of the above issues have been corrected with the release of version 2.20.
- No known safety issues remain open.
- For firmware updates to a unit in the field that is experiencing any of these issues, please contact Micro Motion service in your area.

Additional Features

No new features were added for this release.

Firmware Checksum: 0x4D9E3DC

MMI-SB-194, Rev A March 2020
